(The older site <https://gallery.metamirror.space/detail/?item=defimooc2021nft-41> has changed due to changes in the oasis blockchain holding those NFTs that were somewhat earlier pioneers for such an idea of using NFTs as course certificates; passing was according to MCQ exam+an article that is available on my GitHub+smart contract lab exercise also available on GitHub).

-For honesty, I passed without getting the smart contract right then I've got it correct afterwards even with different versions (trying the 2 steps liquidation for > 50% that was not required by the lab, only presented in the lectures as a new contribution from the professor's paper).

Masters I've Supervised

Intelligent Technique For Computer Virus Detection (**papers 8 & 13**)

Study Of Encryption Algorithms (**papers 14 & 16**)

https://srv3.eulc.edu.eg/Eulc_v5/Libraries/start.aspx?fn=ApplySearch&ScopeID=&SearchText1=A+secure+routing+protocol+for+mobile+AD-Hoc+networks&criteria1=0.

(My name does not appear because only the main supervisor is listed and the thesis was in another faculty, Engineering, than the one I was working in. However, you can see from the paper in 15 that I've participated in the thesis; the thesis resulted in one paper only, but it was a stronger paper that was accepted in IEEE and was eventually published in a journal).

A Machine Learning Approach for Web Usage Mining

https://srv3.eulc.edu.eg/eulc_v5/Libraries/Thesis/BrowseThesisPages.aspx?fn=PublicDrawThesis&BibID=11112306

(I was not closely involved with the scientific contribution of this thesis; I've only participated in the writing guidance and review process. In fact, I joined the supervision to solve a procedural problem and resigned before the final debate)
